RE: Feasibility Study Addendum, Site 33, Midfield Maintenance Hangar, Surface and
Subsurface Soil, Revision 1, NAS Whiting Field

Dear Ms. Martin:

I have reviewed the above document dated August 2004 (received September 3, 2004).
Please adequately address the following in the final document:

1. The term "persistent" is used as a descriptor for arsenic throughout the document (see page 4-1 and Table 4-2). It is an inappropriate term. Please correct this.
2. Table 4-1: in the columns under "Alternate Description," The March 2001 FS says to remove the UST; the FS Addendum of 2004 states it was removed in August 2000. There seems to be a discrepancy in the dates (the 2001 document discusses removing a UST that the 2004 document says was removed in 2000). Please check for the proper dates.
3. Section 4.2.4, page 4-7, second sentence: what is meant by the term, "they slightly decrease the reduction of volume..?"

Thank you for the opportunity to comment on this document. If you need additional information or further clarification, please feel free to call me at 850-245-8999.

Sincerely,

James H. Cason, P.G.
